Vita Comfort UK

customerservices@thevitagroup.com
www.vitacomfort.co.uk

The Vita Group's latest contribution to the bedding industry.

Shaped by knowledge and cutting-edge innovations, Vita Comfort UK remains at the vanguard of innovation, forever committed to pioneering advanced foam solutions for a sustainable world.

FRee foam is our latest innovation which is TCPP and scorch-free and has reduced odour. Yet, the comfort, durability and recovery you expect from Vita Comfort UK combustion modified ether foam whilst also meeting the high fire safety standards required by the UK and Irish regulations.

FRee technology can be applied to our current conventional portfolio of grades to allow furniture and bedding manufacturers to offer a more sustainable story to their products. FRee has significant benefits for producers, retailers, consumers and the environment.

Bedding

Medical

Furniture

At The Vita Group, we recognise our responsibility to maintain safe and proper chemical selection and usage, on behalf of our customers.

We work to improve the chemical profile of our products and see it as an integral part of our service - we take care of the chemistry, so our customers don't have to. Therefore we want to clarify to our employees and customers about the flame retardants used in foam furniture components, especially about what we do and don't use in our products.

We do not use any TDCP or TCEP in our comfort foam products which go into sofas and beds. And beyond that we are actively using our advanced materials science and innovation skills to develop products that do not use these at all.

In 2019 we introduced a range of Combustion Modified Ether (CME) foam products that have been formulated without TCPP – our 'FRee' foam range. The foams in this award-winning FRee foam range achieve the high standards of fire safety required by UK and Irish regulations, without compromising on technical performance or chemical safety, and we are proud to be the first UK company to offer these products to the furniture and bedding industry.

BENEFITS OF FRee FOAMS

- ▼ TCPP Free
- ▼ Scorch Free
- ▼ Excellent Recovery
- ▼ Reduced Odour
- ▼ Reduces pressure
- ▼ Provides comfort and support
- ▼ Conforms to body shape
- ▼ Open-celled and breathable
- ▼ Excellent block shape
- ▼ Good tensile strength
- ▼ Outstanding compression qualities
- ▼ Enhances product value

Always thinking outside the box, Free is The Vita Group's latest contribution to the bedding industry.

The latest development from Vita is FFree foam, winner of the prestigious NBF Innovation of the Year Award.

FFree is TCPP-free, scorch-free and has reduced odour yet makes no compromise on quality, performance or fire retardancy. Not waiting for any potential change in legislation concerning fire retardant chemicals, The Vita Group has developed a range of combustion modified ether foams that meet the high standards of fire safety required by UK and Irish regulations without the addition of fire-retardant chemicals.

The range is available in several grades to allow furniture and bedding manufacturers to customise their product construction. This foam has significant benefits for producers, retailers, consumers and the environment.

WHY FFree MEMORY FOAM?

Soft yet supportive

Provides optimal support and comfort

Highly durable

Shape retaining and long lasting quality

Optimal ventilation

Moisture and heat dissipates quickly

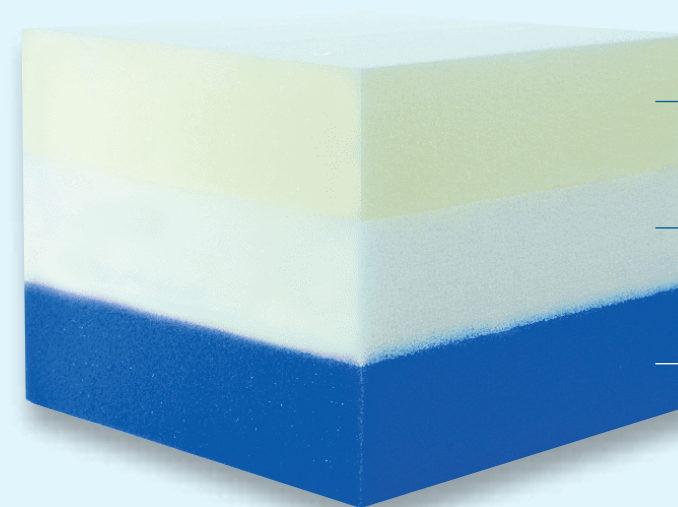

Hypoallergenic

Perfect for allergy sensitive people

Shaped by knowledge and a proud heritage of 70 years

At Vita, we continually explore new ways to fuse creativity and technology to breathe fresh life into our solutions. Our commitment to research and innovation is embedded in everything we do.

Visco-elastic

Comfort layer

Support layer

Free is TCPP-free, scorch free and has reduced odour, yet has the comfort, durability and recovery you expect from Vitafoam combustion modified ether foams, meeting the high standards of fire safety required by UK and Irish regulations.

Shaped by knowledge and a proud heritage of 70 years, Vitafoam remains at the forefront of innovation, forever committed to pioneering advanced foam solutions for a sustainable world.

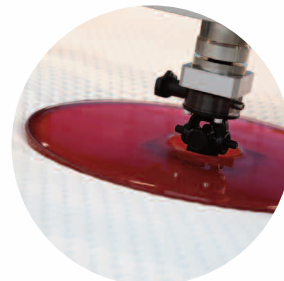

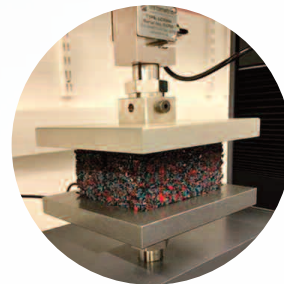

We develop the very best solutions for a wide range of customer applications

The Vita Group's Medical portfolio spans from the production of medical mattresses for hospitals and nursing homes to Vita's seating solutions designed to reduce pressure sore development through weight distribution.

To assist in the selection of foams or testing of finished or semi-finished products The Vita Group has invested in an innovation centre capable of testing to known industry standards.

INNOVATION CENTRE TESTING CAPABILITIES

- ✓ Pressure mapping (Interface pressure - evaluate localized pressure - immersion area)
- ✓ Shear pressure
- ✓ Heat Dissipation and breath-ability
- ✓ Durability test
- ✓ Tensile testing
- ✓ Displacement mapping
- ✓ Temperature and humidity mapping

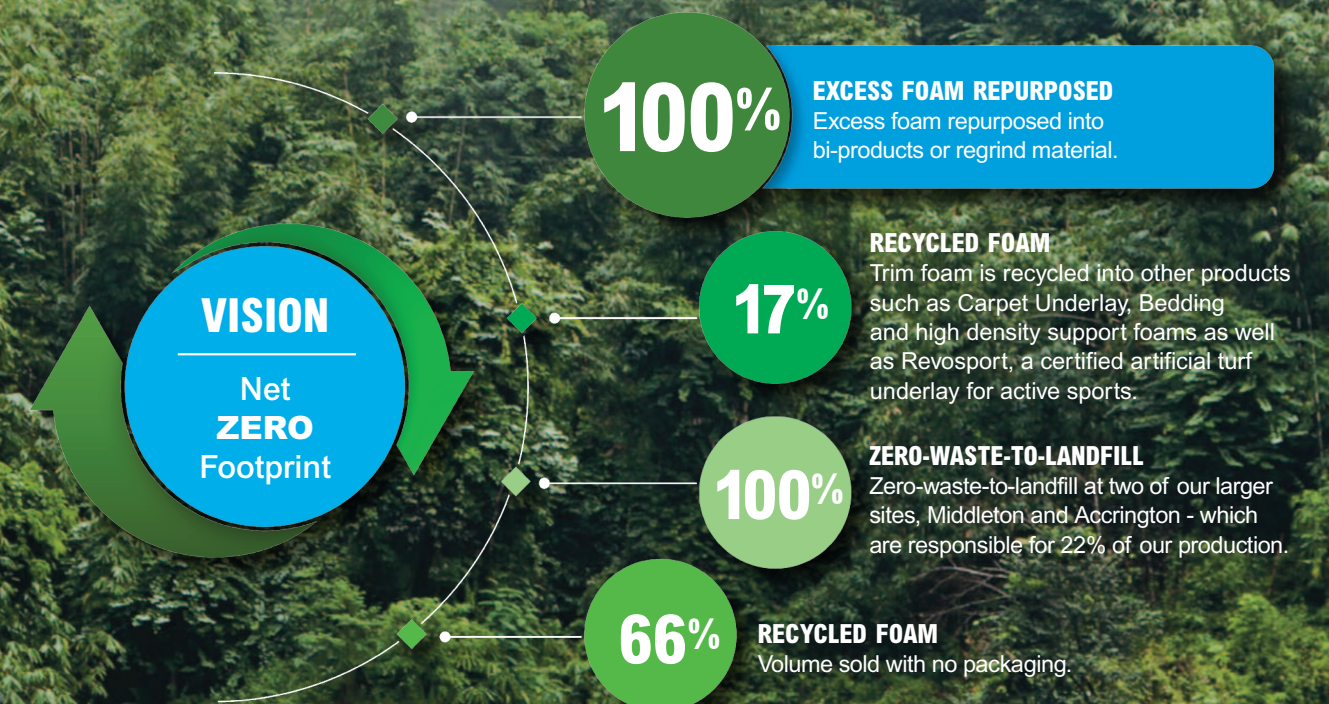

enhancing
everyday
life

We aspire to be the leader in innovation and sustainability in the flexible PU foam industry

At The Vita Group, we continuously invest to sustainably deliver the very best solutions for our customers and future generations.

As a responsible, resourceful and safe business we commit to and invest in reducing waste, increasing recycling and reusing raw materials, and conserving natural resources in pursuit of a net zero footprint.
